

# Essential Care

Today, 46M+ adults aged 65 and older in the U.S. Many are incontinent, have fragile skin, and vulnerable to skin wounds and pressure injuries that can be very painful and sometimes challenging to heal, especially when exposed to incontinence bowel and bladder.

## Helping Care for the Incontinent

- Patients do not always know when incontinence occurs.
- Incontinent episodes can occur after hourly rounding checks.
- Live alerts signal immediate attention.
- Real-time alerts dismiss uncertainty, allowing improved sleep patterns.
- Wet trends improve toileting schedules.
- Quick wetness response improves patient satisfaction.
- Accountability produces best practices.
- Wet alerts reduce liability and increase efficiency.

**Provides 5-Star  
Incontinent Care**

# AlertPad™

Our incomparable AlertPad™ is soft outside with high-tech inside.

A soft non-woven cover layer keeps patients comfortable. Absorbent tissue sandwiching a dry core fiber infused with super-absorbent polymers provides flash dryness to touch and feel while locking away moisture and neutralizing odors. Retains 1000+ mL of wetness while lying flat without bunching, swelling, or disintegrating. An airflow layer for breath-ability follows our high-tech moisture sensor with a strong-protective bottom that prevents leaks and protects linens.

- ✓ **36" x 30" Disposable Intelligent Pad**
- ✓ **Soft, Breathable, and Prevents Leaks**
- ✓ **Retains 1000+ mL and Repositions Patients 350+ Pounds**

**SECURE & RELIABLE**

**Customized  
Reporting**

**Live Visual Views**

# AlertWet® System

Our system has been built on proven software since 1986, supporting the DoD health system and combining it with innovative technology used to support the largest Defense contractor in the world.

**You can't manage what you don't know!**
